Jiangmen LT Motor Co., Ltd.

Jiangmen LT Motor Co., Ltd. is located in Chaolian Industrial Park of Jiangmen, the factory occupies an area of 30,000 square meters. LT Motor is a high-tech micro motor manufacturing company. The original register capital is 30 million RMB, and the first-stage investment is 125 million RMB. LT Motor imports worldwide famous YAHOTEC production line, utilized in producing high level performance motors. The original capacity is 45 thousand pcs per day, The company main product range is aircon steel-packing motor, resin motor, high-power motor, tub washer motor, and various types of DC motors, for domestic and overseas appliance industry.

Based on the company culture of "Leading Technology, Leading Idea", LT Motor adopts advanced technology, equipments, and high-level talents to establish a powerful technology-oriented service team, in order to provide competitive products in performance, quality, and price to all customers.

We warmly welcome all old and new customers to come to us.

Steel-shell Aircon Motor

Steel-packing motor is widely used in the industry of air conditioning of the capacitor running type of single phase ac asynchronous motors, the design of the motor is according to the national standard and absorb the advantages of international similar products, it has small size, high efficiency, low noise, good operation performance, etc.

Specification:

Φ80 ~ Φ160 Single, Double Shaft Type

technical characteristic:

Voltage: 100~120VAC、208~240VAC

Frequency: 50Hz、60Hz、50/60Hz

Power: 2W~600W

Speed: 300rpm~1650rpm

Insulation Class: Class B/F

Protection Grade: IPX0、IP24

Application:

Residential Airconditioner, Rang Hood, Heaters, Blowers

Rolled Shell Aircon Motor

This motor cabinet cold rolled steel plate, aluminum alloy cover structure, low noise bearing design, reasonable structure, reliability; With the unique electromagnetic design, reasonable turns ratio, flux density and the secret, the design of roller motor has the high efficiency, low noise, low temperature rise, etc, is the ideal home, commercial air conditioner motor.

Specification:

φ 95、φ 110、φ 120、φ 140、φ 160

technical characteristic:

Voltage: 100~120VAC、208~240VAC

Frequency: 50Hz、60Hz、50/60Hz

Power: 5W~750W

Speed: 300rpm~1650rpm

Insulation Class: Class B/F

Protection Grade: IPX0、IP24

Application:

Split-type Aircon, Window Type Airconditioner, Ceiling Airconditioner, Commercial Airconditioner, Blowers

Duct Blower Motor

We can according to customer requirements, design the motor which can be matching different diameters of impeller, static pressure. The motor cabinet cold rolled steel plate, aluminum alloy cover, overall compact structure, attractive appearance, durable, reliability; It has high efficiency, low noise and low vibration, big air volume etc.

Specification:

φ 95、φ 110、φ 120、φ 140、φ 160

technical characteristic:

Voltage: 100~120VAC、208~240VAC

Frequency: 50Hz、60Hz、50/60Hz

Power: 5W~750W

Speed: 300rpm~1650rpm

Insulation Class: Class B/F

Protection Grade: IPX0、IP24

Application:

Window Type Airconditioner, Ceiling Airconditioner, Commercial Airconditioner, Blowers

Resin-type Aircon Motor

Specification

φ 92~ φ 120

technical characteristic:

Voltage: 100~120VAC、208~240VAC

Frequency: 50Hz、60Hz、50/60Hz

Power: 5W~100W

Speed: 1000rpm~1400rpm

Insulation Class: Class B/F

Protection Grade: IPX0、IP24

Application:

Airconditioner Outdoor Unit & Indoor Unit
